

Notes on Project 36.2754

P. 2, Fig. 1

It would facilitate comparison if these 5 charts were superimposed onto a single chart with a common scale.

P. 3

1958 TV production given as 57.1 TH sets in FBIS, 7 April 59, Supplement 21-59, p. 22 and the Concise Statistical Year Book of the Polish People's Republic, 1959, p. 37. Compare with 58 TH in Table 2.

P. 10, Table 1

Why is civil communications data rounded and other series not? See p. 53.

P. 11, 1. 7

Source for 16.4% increase in output of the machinery and metal-working industry? I figure this as 14.8% (based on $\frac{1957}{1956} = \frac{52.6 \text{ bil. zl.}}{45.8 \text{ bil. zl.}}$).

Are the electronics numbers also based on gross production? And are the price bases comparable?

P. 13

Show 1959 and 1960 information as planned and estimated; footnote zlotys to show type; footnote values to show in retail prices, net of turnover tax.

Note that what appears to be 1958 production is given as 1.8 bil. zloty in FID, WERKES No. 260 (Summary 2281), 19 Aug 59, p. 5. Compare with 1.6 bil. in Table 2. The same source gives the 1959 planned output for the electronics industry as 5 bil. zloty. Compare with 2.9 bil. in Table 1.

P. 16, 1st full para, ll. 5, 9

Compare TV production, 1958.

P. 16, ll. 4 up

Compare 1965 goal of 440,000 TV sets with 1,100,000 in FBIS, 7 Apr 59, Supplement 21-59, p. 22. Is this an FBIS misprint? Note identity with 1965 radio plan.

~~SECRET~~

SECRET

P. 18

Show kind of zlotys.

Pp. 17-24, 48-50

On p. 48, Polish radar is valued but it is not clear in what kind of prices. Is this manufacturer's sales price in 1956 prices? Is the value of the military radio equipment in comparable prices? How is the index for this military communications equipment converted to a value series?

P. 55, 2nd tabulation

In what kind of prices are these?

P. 33, Table 4, and p. 34, middle para.

Compare with FID, WIERNE No. 260 (Summary 2281), 19 Aug 59, p. 5, which gives 1958 production of cathode ray tubes as 10,000 and transmitter tubes as 14,000. Has this source been considered?

Does not source 28 refer to TV production for 1957 instead of picture tubes for 1958?

Source 26 (Note "a" in Table 4) covers only 1955-57. Page should be 66, not 58.
